Federal Employee Parking Facilities

ACTION: Circular A-118, Transmittal Memorandum No. 1, dated November 8, 1979.

SUMMARY: The definition of those handicapped personnel exempt from a fee for parking at Federal facilities has been modified based on consultation with the President's Committee on Employment of the Handicapped and the Architectural and Transportation Barriers Compliance Board. The previous definition would have had the unintended effect of excluding some severely handicapped individuals.

November 8, 1979.

Circular No. A-118.

Transmittal Memorandum No. 1.

To the Heads of Executive Departments and Establishments

Subject: Amendments to Circular A-118—Federal Employee Parking Facilities

1. Purpose. This transmittal memorandum provides several changes to definitions or requirements contained in Circular A-118.

2. Handicapped personnel. In lieu of paragraph 5(i), substitute the following new definition:

5(i). *Handicapped Employees:* Employees who have a severe, permanent physical or mental impairment which, for all practical purposes precludes use of public transportation, and employees unable to operate a car as a result of a permanent impairment (e.g., the blind) and are driven to their place of employment by someone else, shall receive a parking space assignment without charge. Individuals who temporarily qualify for a handicapped parking space (e.g., due to a strained back, during convalescence from an illness or a broken leg) are not exempt. Personnel who qualify for handicapped parking are encouraged to sponsor and participate in a carpool which could use the space assigned. Agency heads may exercise discretion in the application of this provision to special circumstances.

Any parking payments collected after November 1, 1978, from personnel who qualify under this definition should be refunded.

3. *Reporting.* The reporting requirement of section (3) in paragraph 14 is rescinded. Other reporting requirements remain in effect.

4. *Parking Control Devices.* The procurement and installation by agencies of parking area control devices such as fences, guard rails, electronically-actuated gates and similar devices is to be discouraged pending several months experience with the fee parking policy. Premature actions are to be avoided because such devices may not be needed, or may be inappropriately located if installed without the benefit of experience. Administrative techniques of permit issuance and spot enforcement are preferred control methods.

James T. McIntyre, Jr.,
Director.
